

Initiative application

Founded in Berlin 2021, we want to contribute to a sustainable energy and utility industry. By digitizing building measurement technology and consumption processes, we create a bundled solution for real estate managers and landlords. We enable the CO2 footprint of buildings to be reported and tenants to be billed for consumption promptly and correctly - including for tenant electricity and e-charging solutions.

Our greatest strength is our team. And we want to expand it continuously. Therefore, we are looking for people with heart and passion! You want to work with us on **software development** or **operations**? Then get in touch with us!

We offer you a hybrid workplace with 50% home office and an office at one of our three locations in Berlin, Düsseldorf and Heidelberg.

Don't hesitate to contact us or send us your application directly to people@metiundo.io.

We are looking forward to getting to know you!

Your metiundo team
